ABOUT ME

Passionate and results-oriented Full Stack Software Engineer with a proven track record of delivering high-quality software solutions. Seeking a dynamic role where I can leverage my expertise in JavaScript, TypeScript, PHP, Dart, and a diverse set of frameworks to contribute to innovative projects. Eager to collaborate with a forward-thinking team and drive technological advancements through creativity, problem-solving, and continuous learning.

WORK EXPERIENCE

Software Engineer Mar 2023 - Present
QCoom Ltd. | Dhaka

- Spearheaded the migration of legacy systems to React.js, improving code maintainability and enabling modern development practices.
- Developed reusable React components, contributing to the efficiency and consistency of the codebase.
- Implemented Next.js for various projects, optimizing page load times and enhancing user experience through server-side rendering (SSR).
- Collaborated closely with the design team to integrate Ant Design components, ensuring a polished and cohesive user interface.

Full Stack Software Engineer Feb 2022 - Feb 2023
Cosmos Group (UNB) | Dhaka

- Successfully re-developed the unb.com news portal. Optimized serverside logic using PHP and Laravel. Improvement SEO strategies, optimizing website content and structure for enhanced search engine visibility.
- Integrated a comprehensive caching strategy using Redis, a load balancer to distribute incoming traffic, and optimized media content delivery through Cloudflare CDN, resulting in a significant improvement in site performance and user experience.

Full Stack Software Engineer Sep 2020 - Jan 2021
Future Sky Limited | Dhaka

- Successfully developed and launched two e-commerce sites (laalsobuj.com, bebsha.com).
- Implemented server-side logic using PHP and CakePHP, optimizing performance and ensuring data integrity.
- Developed REST APIs for mobile application and more projects and so on.

- Nginx, Apache
- Linux Commands
- Little Bit Vagrant, Docker, Kubernetes
- Load Balancer
- Cloudflare CDN
- VPS server configuration

LANGUAGES

English – Professional

Full Stack Software Engineer

Jan 2019 – Jun 2020

e-CAB & Comjagat | Dhaka

In this association, I worked on a couple of existing projects based on Laravel and WordPress and developed a web-based live conference/meeting management application for Grameenphone and British American Tobacco using PHP CodeIgniter.

Web Developer

Aug 2019 – Dec 2019

Speaklar.com | Dhaka

I finished my internship here as a web developer. Here I mainly worked on Laravel and developed two government projects for the Barisal division, one was for the water billing system and the other was for holding tax.

PROJECTS

QFOOD – TypeScript | Next JS | Tailwind CSS | Mapbox

- Successfully developed from scratch and launched qfood.com.bd, meeting project goals and timelines.
- Lead the entire project plan and development. Planning the project architecture design, and choosing the right tools and libraries.
- Solved all challenges optimization and developed re-usable component.

UNB – PHP | Laravel | Redis | Tailwind CSS | MySQL

- Successfully re-developed from scratch unb.com.bd. Lead the entire project plan and development, choosing the right tools and libraries.
- Optimized code and server-side logic for high performance. Integrated load balancer, Cloudflare CDN, and SEO optimized code and content structure and etc.

QCOOM – TypeScript | Next JS | Tailwind CSS | Ant Design

- Developed lots of new features and optimized existing code and components.
- Like re-design and developing product cart and payment gateway, Full auction feature and more.

Laalsobuj.com, Bebsha.com – PHP | CakePHP | Bootstrap | MySQL

- Successfully launched. Worked as a core developer. back-end and front-end and APIs.

Water Billing System, Holding Tax System (Barisal City Corporation) – PHP | Laravel | Bootstrap | MySQL

- Developed from scratch, Project planning, system design, requirement analysis, everything done for Barisal City Corporation.

Wordle Web Game – React | TypeScript | Tailwind CSS | Node

Dhaka Courier – PHP | Laravel

Auto Silent Scheduler – Dart | Flutter
