

SABUJ ISLAM

Senior Full Stack Software Engineer (Backend-Focused)

Phone: +880-1775559622 | **Email:** sabuj0338@gmail.com | **GitHub:** <https://github.com/sabuj0338> |

LinkedIn: <https://www.linkedin.com/in/sabuj0338> | **Portfolio:** <https://sabuj0338.github.io/portfolio/>

PROFESSIONAL SUMMARY

Senior Full Stack Software Engineer with 5+ years of experience building scalable SaaS and enterprise applications. Strong backend expertise in Node.js (NestJS, Express) and Go (Fiber), with working experience in React.js and Next.js.

Skilled in microservices, REST APIs, distributed systems, and real-time communication. Recently focused on AI systems, including Retrieval-Augmented Generation (RAG), vector search, and LLM integrations.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Go, PHP, Python

Backend: Node.js (NestJS, Express), Go Fiber, Laravel, Lumen, FastAPI

Frontend: React.js, Next.js, Tailwind CSS

Databases: MySQL, PostgreSQL, MongoDB, Redis

Real-Time: WebSockets, Socket.IO, WebRTC

DevOps: Docker, Nginx, AWS, DigitalOcean, CI/CD

Security & Testing: JWT, OAuth, MFA, Jest, Go Testing

PROFESSIONAL EXPERIENCE

Lead Software Engineer — Speaklar

Jan 2024 – Present

- Lead backend engineer for AI-driven SaaS applications.
- Built scalable REST APIs for high-concurrency systems.
- Optimized performance using caching and database tuning.
- Mentored engineers and enforced code quality.

Senior Software Engineer — QCoom Ltd.

Mar 2023 – Dec 2023

- Developed scalable full-stack applications using Node.js and React.
- Improved development speed by ~30% via reusable modules.
- Ensured performance, scalability, and maintainability.

Full Stack Software Engineer — Cosmos Group (UNB)

Feb 2022 – Feb 2023

- Rebuilt a high-traffic news platform serving millions of users.
- Reduced response time by 85% and improved page speed by 80%.
- Implemented Redis caching and CDN optimization.

Full Stack Software Engineer — e-CAB & Comjagat
Aug 2019 – Jan 2022

- Built enterprise applications for real-time conferencing systems.
- Developed chat, dashboards, and video features.
- Improved API security and system performance.

PROJECTS

Multi-Tenant ERP SaaS

- Designed a scalable multi-tenant modular architecture for an ERP platform.
- Developed APIs for catalogs, partners, orders, warehouse, and cash routing workflows.
- Built frontend interfaces supporting dynamic content and user interactions.

UNB News Portal

- Optimized backend and frontend for a high-traffic system.
- Improved performance, scalability, and reliability under heavy load.

bVideo.ai

- Developed a video-making platform using AI. Customized HTML video player.
- Implementing multi-plan subscription management.

Real-Time Task Manager (GTM)

- Built a real-time system using Go, Redis, WebSockets, and Pub/Sub for live synchronization.

Water Billing & Holding Tax System (Barisal City Corporation)

- Designed and developed a complete tax and billing system for city administration.
- Automated system for calculating and generating bills that increased productivity by 80%.

RAG-Based AI System

- Built RAG pipeline: ingestion → embeddings → vector search → LLM response.
- Used FAISS for semantic retrieval and context-aware responses.

EDUCATION

B.Sc. in Computer Science & Engineering
Prime University | 2015 – 2018

KEYWORDS

Full Stack Developer, Backend Engineer, Node.js, Go, NestJS, Microservices, REST API, Distributed Systems, React.js, Next.js, MongoDB, PostgreSQL, Redis, WebSockets, Docker, AWS, CI/CD, RAG
