SABUJ ISLAM

Full-Stack Software Engineer

Phone: +880-1775559622 | **Email**: sabuj0338@gmail.com | **GitHub**: https://github.com/sabuj0338 | **LinkedIn**: https://www.linkedin.com/in/sabuj0338 | **Portfolio**: https://sabuj0338.github.io/portfolio/

PROFESSIONAL SUMMARY

Senior Full Stack Engineer with 6+ years of experience specializing in scalable web application development, microservices, NestJS, and Next.js. Expertise in designing robust backend services and optimizing PostgreSQL databases.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Go, Python, PHP
Backend: Node.js (NestJS, Express), RESTful APIs, Go Fiber, FastAPI
Frontend: Next.js, React.js, Astro.js, Tailwind CSS
Database: MySQL, PostgreSQL, MongoDB, Redis
Cloud & DevOps: Docker, CI/CD, Nginx, Load Balancer, Kubernetes, AWS

PROFESSIONAL EXPERIENCE

Full Stack Software Engineer — Workspace Infotech Ltd
Mar 2025 – Present

- Serving as the lead software architect and primary technical authority for high-traffic platforms supporting millions of global users, delivering end-to-end frontend, backend, and DevOps solutions.
- Architecting scalable features and optimizing overall page load and API performance through advanced caching strategies, strategic database tuning, and efficient full-stack implementations.
- Mentoring team members, driving technical decision-making, and establishing robust engineering workflows and code review practices to ensure high reliability and developer velocity.

Senior Software Engineer — QCoom Ltd.
Mar 2023 – Dec 2023

- Engineered scalable backend services using Node.js and TypeScript to support high-volume e-commerce transactions.
- Improved developer velocity by 30% by refactoring monolithic code into reusable components.

Full Stack Software Engineer — Cosmos Group (UNB)
Feb 2022 – Feb 2023

- Rebuilt a high-traffic news platform; reduced response time by 85% by implementing Redis caching and Node.js request optimization—scaled system infrastructure using CDN strategies to handle millions of daily concurrent users.
- Optimized system architecture to ensure 99.9% uptime during high-traffic load events.

Full Stack Software Engineer — e-CAB & Comjagat
Aug 2019 – Jan 2022

- Developed enterprise-grade real-time conferencing systems utilizing WebSockets and Node.js.

PROJECTS

Lufenen (https://lufenen.com/)

- Founder & sole developer responsible for end-to-end architecture, development, and deployment entirely on Cloudflare.
- Built scalable full-stack features using Next.js for the frontend and NestJS with PostgreSQL and Redis for the backend infrastructure.
- Engineered a deployment agent and provisioning system using Go.

Multi-Tenant ERP SaaS

- Architected a scalable multi-tenant SaaS backend using Node.js/NestJS, reducing database query latency by 40% through optimized API routing.
- Designed modular services for inventory, partner management, and automated cash routing workflows.

bVideo.ai

- Developed a video-making platform using AI. Customized HTML video player.
- Implemented multi-plan subscription management.

Real-Time Task Manager (GTM)

- Engineered a low-latency live sync system utilizing Go, Redis, and WebSockets to handle concurrent user state management and team collaboration.

UNB.com.bd

- Spearheaded the redevelopment of a high-traffic news portal serving millions of users. Increased site speed by 80% and reduced server response time by 85%.

Multi-Vendor E-Commerce

- Designed a scalable multi-tenant SaaS architecture for vendors and products.
- Engineered MongoDB schemas to support thousands of concurrent SKUs and vendors.
- Implemented secure APIs for product management, checkout, and order workflows.

EDUCATION

B.Sc. in Computer Science & Engineering
Prime University | 2015 – 2018
